Marina Owner – Rental to watercraft owners
Maintenance – Protects watercraft during repairs
Watercraft Owner – Protects watercraft electronics

Part Number	Surge Guard Marine Power Protection	Product Description
67040	30A Portable with Ground Fault Protection	Weather and water resistant. Protects smaller 30A watercraft from faulty pedestal power and automatically shuts off the power when ground faults are present. Manual reset after a ground fault. Marine connectors. 510 Joules of surge protection.
67010	30A Portable Surge Protector	Perfect for smaller 30A watercraft. Weather and water resistant. Identifies faulty pedestal power. Analyzes circuits to verify pedestal power. Indicates power status. Tests for and indicates open ground, open neutral and correct polarity. Marine connectors. 2100 Joules of surge protection.
67030	30A Portable with LCD Display	Protects 30A watercraft from faulty pedestal power and has built-in intelligence. Shuts off power when the following is present: open neutral, low (102V) and high (132V). LCD display (English). Continuously monitors for: voltage and amp draw, reverse polarity (miswired pedestal, elevated ground voltage). Weather and water resistant. Marine connectors. 2450 Joules of surge protection.
67050	50A Portable with LCD Display	Protects 50A watercraft from faulty pedestal power and has built-in intelligence. Shuts off power when the following is present: open neutral, low (102V) and high (132V). LCD display (English). Continuously monitors for: voltage and amp draw, reverse polarity (miswired pedestal, elevated ground voltage). Weather and water resistant. Marine connectors. 3850 Joules of surge protection..
